RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

4, 2008. The corrected sampling plan figure (figure 5-Proposed Plant Facilities and Agricultural Sample Locations) was received on March 5, 2008. The PEA Scoping Document was revised based on the Site walk on February 13, 2008; the Scoping Meeting on February 15, 2008; and conversations over the phone. DTSC comments are adequately addressed and DTSC concurs with the Revised PEA Scoping Document, with an exception of further delineating the Site (in Supplemental Site Investigation stage), if elevated levels of contaminants are detected. Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info: This site consists of Parcels 16 and 17 of a ten-parcel area. The property was acquired through eminent domain by Caltrans for the realignment of the I-105 freeway. Previously, the property was used intermittently as a landfill. Parcel 17 is an old dump site with Class III materials. Parcel 16 was used as a series of three landfills, one on top of the other. The upper layer of the mound is mainly soil with concrete and rubble, containing primarily lead contamination. The middle layer is a mixture of soil, concrete, brick, wood and glass with no contamination. The lower-most layer was deposited between the mid-1940s and early 1950s as mainly landfill debris. The lowest layer is the most contaminated, exceeding one or all of the state and federal action levels for lead, copper, zinc, total petroleum hydrocarbons and semi-volatile organic compounds. Possible pathways of contamination include blowing dust, and percolation downward to groundwater. Possible receptors include workers onsite, residents in the area, and persons digging on the site. The parcels were fenced in 1987. A Focused Remedial Investigation/Feasibility Study and Health risk assessment was completed by Caltrans in 1990 for the planned removal action within the right-of-way portion of Site 16. A community workshop meeting for the planned removal action was held by Caltrans in 1990. Based on a MOU between Caltrans and the Department, the Department has assumed the responsibility for remediation of the unexcavated portion of Site 16. The RAP was approved in September of 1992. Approximately 350,000 cubic yards of contaminated soils have been removed and geotextile clay caps/drainage systems have been installed

pursuant to the RAP and Remedial Design Report. The Department has certified that all appropriate remedial actions have been completed for Site 16 and Site 17. A Deed Restriction has been placed on Site 16 to ensure future uses of the site will not damage the cap or wells and will be protective of human health and the environment. Annual soil gas monitoring, cap inspection and maintenance will be performed on Site 16 and Site 17. The first round of monitoring is expected to commence November 1995.
