

HARDSHIP JUSTIFICATION FORM

City of Los Angeles Emergency Water Conservation Plan
(Outdoor Water Use Only)

Applicant Name: _____

Street Address for Variance: _____

Account #: - - - - - - -

Please indicate the condition that applies (place an "X" in the box) and provide requested information. Attach additional sheets of written explanation (if needed). Please attach supporting documentation such as photographs, maps, drawings, or other pertinent information.

Hardship 1: Watering days insufficient to run system.

Variances may be granted if the sum of run times per irrigation system during summer season (June 1 to October 31) exceeds 17 hours.

Number of valves/stations associated with irrigation system: _____

Type of sprinkler head: _____

Requested watering schedule: _____

Hardship 2: Watering days do not allow for plant establishment.

Variance may be granted for plant establishment if occurring between November 1 and April 30

Square foot measurement of area to receive plant establishment _____

Location of plant establishment on site (i.e. front yard, back yard): _____

Anticipated date of planting: _____

Length of plant establishment (up to three months): _____

Requested watering schedule: _____

Hardship 3: Brush management for fire prevention.

Variance may be granted for Brush Management if the Fire Department finds a risk factor in watering only on the designated days of the week.

Square foot measurement of area to receive additional watering days: _____

Location of brush management on site (i.e. front yard, back yard): _____

Requested watering schedule: _____

Hardship 4: Physical Disabilities

Variance may be granted for physical disabilities which prevent compliance with the Emergency Water Conservation Plan. Please provide a Physician's note that supports that the applicant cannot comply with the ordinance requirements under which an exemption is requested; however, please do not disclose any specific medical condition.

Requested watering schedule: _____

This application does not increase your current Tier I allotment. Any water usage above your Tier I allotment will be charged at Tier II rates.
