

SILVER LAKE RESERVOIR COMPLEX IMPROVEMENT PROJECTS

LADWP is committed to being a good neighbor to the communities we serve. After completion of construction work at the Silver Lake Reservoir Complex and after receiving feedback from members of the community in and around the Silver Lake area, LADWP has responded to requests from the public with a series of improvements.

In partnership with Councilmembers David Ryu, 4th District, and Mitch O'Farrell, 13th District, LADWP is opening up access along the crest of Silver Lake Dam to create a walkway from Silver Lake Boulevard to West Silver Lake Drive, as well as opening up access adjacent to Ivanhoe Reservoir as a publicly accessible walkway. LADWP also plans to install a modular office unit within the Silver Lake Reservoir Complex to serve as office space for LADWP staff supporting the replacement of aging infrastructure and the delivery of large capital improvement projects in order to better serve the citizens of Los Angeles.

Silver Lake Dam Walkway

Construction Completed

The Silver Lake Dam Walkway is accessible via existing gates on either side of the dam, with 8-foot-tall fencing along the access paths and 4-foot-tall fencing along the crest of the dam. Project has been completed and the walkway is open to the public.

Ivanhoe Walkway

Construction: Spring 2018 – Winter 2019

The Ivanhoe Walkway will have two access points from West Silver Lake Drive:

- Just south of Tesla Avenue
- North of Hawick Street

Eight-foot-tall fencing installed along the access paths and 4-foot-tall fencing installed along the side facing the reservoir. Handrails and guard rails need to be installed and painted. Estimated opening is early 2019.

Modular Office

Construction: Fall 2019 – Winter 2020

One 60-by-60-foot modular office will be installed just east of Silver Lake, within LADWP property. Prior to installation a foundation will be constructed and water, power and sewer connections will be made. When complete, 25-30 employees will report to the modular office. Parking for both personal and LADWP vehicles will be provided at the site.

Master Plan

Master Planning process led by the Bureau of Engineering and funded by LADWP began in 2018. The Master Plan will include community input on the future passive use of Silver Lake Reservoir. For more information, visit <https://eng.lacity.org/slrcmp-home> or email eng.slrcmp@lacity.org.
